Background

The 2015 NECE Conference in Thessaloniki will build on the 2014 NECE Conference in Vienna, which focused on the conflicts in and around Europe. Starting point of this year's conference will be the question of how to reimagine and define the role of citizenship education in increasingly divided and polarized societies. Fundamentalist religious, ethnic and cultural perceptions of 'Us' and 'Them' play an ever more important role in the ongoing crises and upheavals in today's world.

The NECE Conference 2015 will look into the causes and the implications of this phenomenon in four areas relevant for citizenship educators:

- Europe's economic, social and political divisions, which have triggered discourses of fear and dissociation in core countries of the EU and have helped nationalistic and populist movements gain ground.
- The perception of an open confrontation between proclaimed values of the 'West' and the 'Islamic World' which has led to dangerous developments in societies on both sides of the Mediterranean.
- The impact of the refugee crisis on European societies in the short, medium and long term.
- The repercussions of the war in Ukraine and relations between Russia, Ukraine and the EU that have led to ideological and nationalist regression and hatred.

Aims

- Discussing the role of 'othering' in an interdependent world and critically reflect the role of citizenship education in this context;
- Collecting relevant research projects, publications, projects and approaches and provide a stocktaking space;
- Defining desiderata and potential actions;
- Creating a transnational space for networking and co-operation to work on the identified desiderata.

Dialogue – mission (im)possible: can non-formal citizenship education be a tool against othering and for mutual understanding of Russian and Ukrainian societies? workshop by MitOst e.V.</p> <p>This workshop is the space to share case studies and concrete experiences as well as to initiate discussion and common counselling on the following questions: Is it possible to resist the 'othering'-trend with non-formal citizenship education? What are the main obstacles and main limits for non-formal educational formats how can they be overcome?
